**Pine Island Cove Boaters Emergency Call Guide:**

This list consists of owners of power boats from Pine Island Cove that have agreed to help any Pine Island Cove Boater in need of assistance in any emergency situation. This includes towing, search and rescue if needed. We have agreed to help any Pine Island cove Boater in need of help within reason.

If you have a problem and need assistance call or text one of the boaters listed below if you have a problem calling try texting. (texting is quicker and will get through better than a voice call) be aware it may take the on call boater 30 to 60 minutes to be on the water and on the way to assist you, plus the travel time to get to your location. If you have VHF radio use the standard procedures to call for help.

The Boater in tow should have his own tow line, and is responsible for all damages and liabilities incurred during the rescue situation.

When you call in, give a description of your boat, the location and a description of what your problem is. Anchor so you don't drift. The more information you can give the responding boater the quicker they can get to your location to assist you. If it is a medical problem consider calling 911

Towing boat Operators should not go out alone, you will need help to handle the problems with the boat in distress.
